India's most SUSTAINABLE Apparel

INSTITUTIONAL CATALOGUE 2025

Cheers to the Earth

Caslay is on a mission to be a part of the solution to the global climate change crisis. We do this by adopting and developing sustainable practices in the apparel industry. With decades of experience in the apparel industry, we believe that fashion and sustainability can go hand in hand.

We strive to create products that are both stylish and eco-friendly. Our collection of recycled apparel is just the beginning of our commitment to reducing waste and promoting ethical practices in the fashion industry.

SUSTAINABLE • RESPONSIBLE • EVERYDAY

The Global Recycled Standard (GRS) was developed by US-based Textile Exchange, a leading global authority on standards for the textile industry.

GOALS OF GRS

- Establish transparency and assurance for recycled fibers
- Certify recycled content in products
- Provide brands and consumers means to make informed decisions
- Reduce harmful impact of production
- Provide assurance that products are processed in climate-friendly ways
- Encourage higher proportions of recycled content in products

Among global textile certifications, GRS is the most comprehensive and rigorous. The producer has to show

- Production facilities
- Recycled content
- Environmental impact
- Sourcing markets
- Labeling processes
- Ethical and socially responsible practices

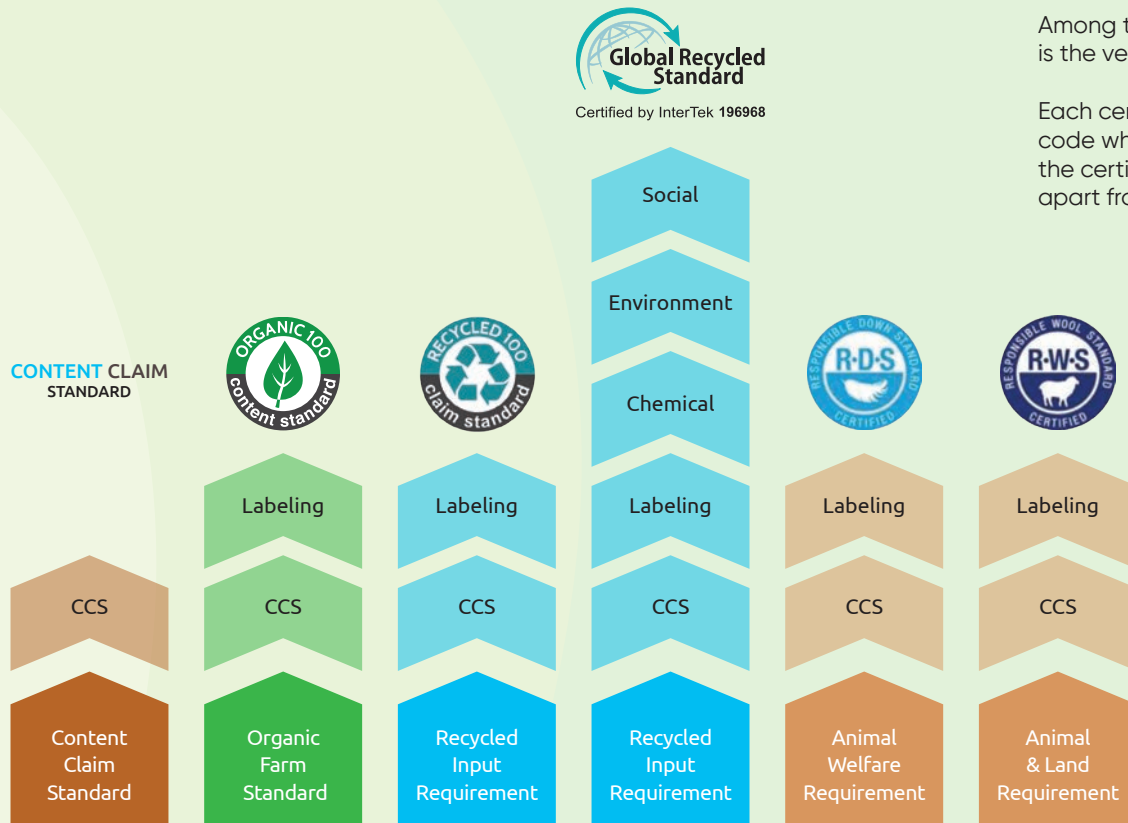

Know where we stand

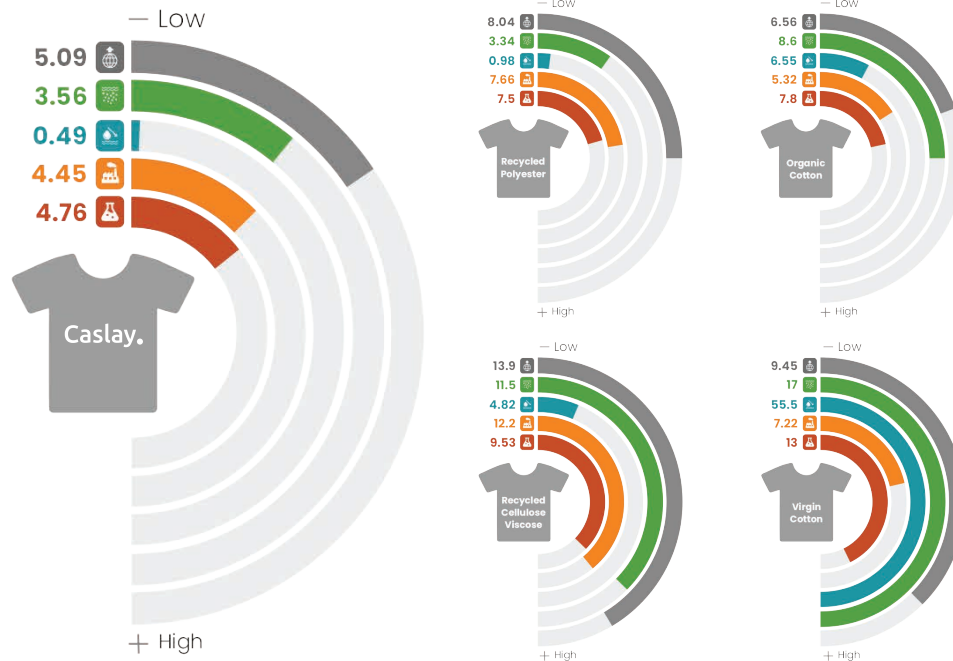

Among the benefits of the GRS certification is the verifiability of the certification.

Each certificate is assigned a unique QR code which can be scanned to download the certificate. This transparency sets it apart from other certifications.

Sustainable Material Impact Meter

We happily declare that the overall Higg impact score of 1 kilogram coloured knitted fabric is 18.36 for garments having recycled yarns, is among the lowest as compared to other textile materials listed on the Higg Index, as it doesn't need dyes or colorants. This score is specifically estimated for Yarns raw material and spinning process (rotor, 250 DTEX-225 denier-24/1 Ne-40 Nm) while keeping other parameters standard at Higg MSI product module.

Your Savings with Fabrics made from Recycled Yarns

* Based on impact parameters difference between 60% Recycled Cotton + 40% Recycled Polyester and 60% virgin cotton + 40% virgin polyester blends for 1 kilogram blends for 1 kilogram knitted fabric

Caslay Advantage

Caslay is committed to the advancement of sustainable fashion. With a state-of-the-art manufacturing facility of 3 lakh square feet spread over four locations, we are able to provide a consistent year-round supply. Our supply chain extends from yarn making to finishing, with complete control over the processes which ensure quality control.

We have the capability to handle high performance fabrics (AATCC and ISO standards) with world-class machinery and processes. Our in-house design team helps keep designs and colours fresh, in line with market demands. We are certified in global standards such as GRS and OEKOTEX that affirm our commitment to provide high-quality sustainable products for the global market. In addition, we go a step further with a 100% replacement guarantee.
