## About Us

---

AS SEEN ON  
**SHARK TANK  
INDIA**  
SEASON 3

P•TAL is building a craft-focused and contemporary brand that revives the heritage of different artisan communities across India. We aim to create poetry with our products, narrating the hidden stories of India's diverse craft form with its unique voice and identity in the kitchenware, cookware, and home decor categories. We aim to become a household brand for everything brass, copper, and kansa.

P•TAL offers handcrafted cookware made from brass, copper, and bronze, designed for connoisseurs who appreciate the artistry of fine metals.

These vessels aren't just cookware; they're alchemists, infusing your meals with essential minerals modern diets often lack. These elements harmonise with your body, promoting wellness from the inside out.

---

### Our Mission

---

Our mission is to inspire healthy living through traditional metals that enhances your daily lifestyle, artfully promoting well-being and nourishment.

## Revival Of India's Only UNESCO-Listed Handcraft

Do you remember the time when our grandmothers' cooked hot meals in '**peetal ke bartan**'? Have you ever wondered who made these beautifully hammered cookware that have been a part of our legacy for generations?

The Thathera community has been an **expert in smelting metals and hand-crafting utensils** for generations, most likely dating back to the Bronze age.

Out of the original 500 families at the time of Maharaja Ranjit Singh, a **mere 30 craftsmen remain carrying on the legacy in Jandiala Guru, Punjab**, the heart of the Thathera community.

Proud of their legacy, our artisans are the foundation of P•TAL. Their belief and trust in us and our vision, is what helped us grow as a brand.

## Message From The Team

---

We started P•TAL with a purpose and vision to revive the age old traditions and blend them with modern lifestyles. The goal with our brand is simple: we want to increase the incomes of our artisans who make the products and improve the health of the consumers who use these products. With the rising health consciousness, we feel that traditional utensils will become cool again and people will focus on not just what they are eating, but also on how they are cooking and consuming it.

It's a dream we have, but we would love for you to witness it, be a part of it and make it a reality!  
Alone, we can do only so little; together we can bring a revolution!
